

COBBLEX

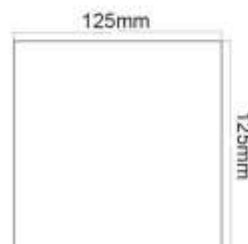

Timeless stone cobble pavement is now possible in your budget. Uncompromised look and quality. Available in stone or shot blasted finish, looks like stone but made of concrete in our state of the art factory.

Available in Weatherex (Shot Blasted) or stone finish in 80mm thickness.

- They are capable of taking heavy vehicular traffic load. A long term investment without worries.
- They are anti-skid which means they will never turn slippery in monsoon. Less chance of slipping while walking.
- No moss formation. They look the same every day as the 1st day
- They can be conveniently cleaned with pressured water jets.

Cobble stones are every landscape architects delight. Since ancient times stone cobbles have been used for roads, most of which exist even today. Now the same product is available in concrete at a fraction of the cost, but without compromising the look of original stone cobbles.
