Exposed Pebble Tile

**BROWN**

## ANTI SKID AND PREMIUM FEEL

The WASH BETON tile is manufactured with our unique tested technology to get that feeling of walking on pebbled sand.

## WASH BETON TILES

- These tiles are manufactured with even pebbles and similar textures giving the pathway a finished look.
- They can be conveniently cleaned with pressurized water jets.
- Besides in-sites job requires skilled labour for a finished look. Wash Beton tiles give an even look when laid as they are factory made.

People have an inherent liking for pebbled pathways. The traditional way to construct this was to buy pebbles from the market and use skilled labour to embed them on a cemented surface. When the cement hardenes there would be a pebbled pathway laid out.

This required skilled labour who would charge hefty fees for laying. Also since the pebbles were uneven they would just get chipped off from the pathway giving it a shabby look.

We identified the problem and delivered WASH BETON tiles as a solution. These tiles are factory manufactured. They are even in finish and homogeneous in texture and colour.

A lot of our customers have saved time, money and most of all had peace of mind after using them. If you want the feeling of pebbles on your pathway, don't hesitate to work with WASH BETON tiles. We had a lot of happy users. You would be next.
